

Fearless Living

for the *Healthcare Professional*

with

Dr. Santi Meunier
January 26-27, 2013

This workshop is open to any serious student of personal growth and liberation. Yoga experience is helpful but not a pre-requisite. It is not necessary to read the Obsidian Trials prior to the workshop. Signed copies will be available at the training or may be ordered at Amazon.com.

As caring professionals, we want to help people to heal and have the best life possible. As Individuals, we want that for ourselves as well, but we can only take a client as far as we have gone. Santi developed the Fearless Living process over 30+ years of personal, as well as professional growth. Fearless living is possible because healing is natural. If we give our bodies, our minds and our spirits what they need, abundance and joy follow because they are our birthrights.

For more information on this event contact us or visit our web page (click on Trainings - Yoga Workshops).

Dr. Santi Meunier, PhD, CYT, CHT

Santi is a practicing psychotherapist, author, lecturer, and film maker. She offers workshops and retreats focusing on Practical Spirituality for Fearless Living and The Seven Steps for Overcoming Our Fears based on her spiritual autobiography, "The Obsidian Trials".
